PROFILE SUMMARY

Motivated and detail-oriented Software Engineer with hands-on experience in MERN Stack and Mobile Application Development. Skilled in building scalable full-stack web applications and cross-platform mobile apps using MongoDB, Express.js, React.js, Node.js, React Native, Expo, TypeScript, Firebase, and Tailwind CSS. Experienced in developing responsive user interfaces, secure authentication systems, RESTful APIs, and role-based dashboards through real-world projects. Passionate about creating efficient, user-focused digital solutions with strong problem-solving abilities and a continuous learning mindset. Seeking opportunities to contribute technical expertise, creativity, and collaboration skills as a Full-Stack MERN Developer.

EXPERIENCE

Front-End Internship | Scholarbee (Pvt.) Ltd

July 2025 – Sep 2025

Completed a front-end development internship, enhancing skills in React and MUI under the guidance of senior developers. Contributed to real-world projects, deployed applications, and gained hands-on experience in building responsive, user-friendly interfaces and improving UI/UX through modern web development practices.

Front-End Internship | MoroSoft-Labs

Feb 2025 – May 2025

Successfully completed an internship where I developed multiple front-end projects using HTML, CSS, JavaScript, React, and Tailwind CSS. Gained practical experience in building responsive designs, interactive user interfaces, and enhancing UI/UX through modern web development practices while collaborating with the development team.

PROJECTS

Smart Donor's | FYP

Description: The Smart Donor System is an AI-enabled web platform designed to streamline the blood donation process by connecting donors and recipients in real time. It integrates features such as live donor mapping, emergency alerts, QR verification, and automated assistance to ensure quick response and reliable communication. The system enhances accessibility, security, and awareness—ultimately building a scalable digital ecosystem that supports timely donations and saves lives.

Kingston Hospital: Full-Stack Mobile Appointment System

Description: Developed a comprehensive mobile application using React Native, Expo, and TypeScript to streamline medical scheduling. Designed secure, role-specific interfaces for Patients, Doctors, and Administrators with features including virtual and in-clinic appointment booking. Integrated Firebase Authentication, Cloud Firestore, and Cloud Functions to deliver real-time data synchronization and secure administrative operations.

Job-Portal SaaS Web-Application

Description: Developed a scalable, AI-powered full-stack SaaS platform designed to modernize the hiring process. The application features secure, role-based access control (RBAC) with dedicated, interactive dashboards for Candidates, Employers, and Admins. It leverages Artificial Intelligence for intelligent job recommendations and automated applicant matching, significantly improving recruitment efficiency. Built with a highly responsive UI using Tailwind CSS and robust RESTful APIs, to ensure high performance, real-time data tracking, and a premium user experience.

Todo-App

Description: Collaborated with a backend Node.js developer to build a full-stack Todo app, contributing as a React front-end developer. Implemented responsive UI, task management features, and API integrations to ensure smooth interaction between front-end and backend services. Gained practical experience in team collaboration, real-world deployment, and full-stack development workflow.

Link: <https://todo-smart-webapp.netlify.app/>

Travel & Tours Website

Description: Developed a responsive travel and tours web app using HTML, CSS, and JavaScript with interactive features, smooth navigation, and a user-friendly interface showcasing destinations and packages.

Link: <https://sharifkhaqan.github.io/Hepta-project/>

Jewelry Website

Description: Healet is a modern, fully responsive online jewelry store built with HTML, CSS, and JavaScript, featuring a homepage, shop, blog, and about page. It offers a stylish design, smooth navigation, and an engaging shopping experience.

Link: not deployed that was using locally.

Weather-App

Description: A simple weather application that fetches real-time weather data using an API. Users can enter a city name in the search bar to get the current weather conditions, including temperature, a corresponding weather image, humidity, and wind speed.

Link: <https://sharifkhaqan.github.io/weather-App/>

Music-App

Description: This is a simple web-based music player that allows users to play, pause, and seek through an audio track. The player features a sleek UI with a circular album cover, progress bar, and controls for playback.

Link: <https://sharifkhaqan.github.io/Music-app>

Product-Page Design

Description: A stylish and interactive product page built using HTML, CSS, and JavaScript. It features an image gallery with clickable controls, product customization options (size, color, quantity), and a responsive layout. Great for showcasing frontend skills and clean UI design.

Link: <https://sharifkhaqan.github.io/Product-page/>

QR-Generator

Description: This QR Code Generator instantly creates QR codes from text or URLs using an API, offering a fast, sleek, and interactive experience.

Link: <https://sharifkhaqan.github.io/Qr-generator/>

Quiz-App

Description: This App offers an interactive and engaging way to test knowledge with multiple-choice questions.

Link: <https://sharifkhaqan.github.io/Quiz-app/>

Calculator

Description: This Calculator Web App is a simple yet stylish arithmetic calculator built with HTML, CSS, and JavaScript. It features a clean UI, smooth button interactions, and essential operations like addition, subtraction, multiplication, and division.
